BELL, BOYD & LLOYD, LLC P. O. BOX 1135 CHICAGO, IL 60690-1135			AILES, BENJAMIN A	
			ART UNIT	PAPER NUMBER
			2142	

DATE MAILED: 06/06/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

09/682,901

Applicant(s)

LINDEMANN ET AL.

Examiner

Benjamin A. Ailes

Art Unit

2142

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☒ Claim(s) 8 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### **DETAILED ACTION**

1. This action is in response to Amendment filed 28 February 2005.
2. Claims 1 and 12 have been amended.
3. Claims 1-15 remain pending.

### ***Claim Objections***

4. Claim 8 is objected to because of the following informalities: On line 1 of claim 8, the claim number is missing and a period is present that should be removed, the claim should be amended as follows: "Claim 8 (original):" Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-5, 7, and 9-14 rejected under 35 U.S.C. 102(e) as being anticipated by Bhatia et al. (U.S. 6,118,768), hereinafter referred to as Bhatia.

7. Regarding claim 1, Bhatia discloses a method for setting up a connection via an IP-oriented network, the method comprising the steps of:

connecting a device, from which the connection originates, to a local computer network (col. 10, lines 19-23);

connecting the local computer network via a router device to a communications network (col. 10, lines 28-33);

connecting the communications network via a plurality of conversion devices to the IP-oriented network (col. 10, lines 28-33);

selecting one of the conversion devices, via a selection unit implemented in the router device, using information transferred by the device (col. 5, line 62 – col. 6, line 8), wherein the information may be transmitted to the router device by an arbitrary device connected to the local computer network, and wherein the information identifies the selected one of the conversion devices (col. 6, lines 9-18); and

setting up a communications link to the select conversion device via the communications network (col. 10, lines 28-33).

8. Regarding claim 2, in accordance with claim 1, Bhatia discloses the method for setting up a connection via an IP-oriented network, wherein the selected conversion device is a default conversion device, a communications link being set up via the default conversion device in cases where no information to the contrary is received in the selection unit (col. 5, lines 43-55).

9. Regarding claim 3, in accordance with claim 1, Bhatia discloses the method for setting up a connection via an IP-oriented network, the method further comprising the steps of:

initializing a connection setup by a first application running on the device (col. 5, lines 40-46 and col. 11, lines 43-53); and

transferring the information originating from a second application running on any given device to the router device (col. 5, lines 40-46 and col. 11, lines 43-53).

10. Regarding claim 4, in accordance with claim 3, Bhatia discloses the method for setting up a connection via an IP-oriented network, wherein the information is transferred via a separate connection via the local computer network (col. 4, lines 45-51).

11. Regarding claim 5, in accordance with claim 1, Bhatia discloses the method for setting up a connection via an IP-oriented network, the method further comprising the step of:

transmitting automatically, via the selection unit, a request message to the device which is transmitting the information in cases where no information is received in the selection unit (col. 4, line 66 – col. 5, line 4).

12. Regarding claim 7, in accordance with claim 1, Bhatia discloses the method for setting up a connection via an IP-oriented network, the method further comprising the step of:

automatically clearing down an existing communications connection between the device and a different conversion device at an end of a definable time period in cases where a new communications connection is set up between the device and a conversion device (col. 34, lines 58-65).

13. Regarding claim 9, in accordance with claim 1, Bhatia discloses the method for setting up a connection via an IP-oriented network, the method further comprising the steps of:

designing the selection unit according to a Domain Name Service proxy, wherein a Domain Name Service enquiry transferred from the device to the selection unit is checked to ascertain whether an Internet name corresponding to the Domain Name Service enquiry and identifying a conversion device is stored in the selection unit (col. 6, lines 9-14); and

forwarding the Domain Name Service enquiry, if the internet name is stored in the selection unit, via the communications network to the conversion device identified by the Internet name (col. 6, lines 25-33).

14. Regarding claim 10, in accordance with claim 2, Bhatia discloses the method for setting up a connection via an IP-oriented network, wherein the transferred information is an IP address (col. 5, lines 16-17) and, when an IP address specifically set up in the selection unit and identifying a conversion device is transferred, the corresponding conversion device is re-configured as the default conversion device (col. 5, lines 17-26).

15. Regarding claim 11, in accordance with claim 10, Bhatia discloses the method for setting up a connection via an IP-oriented network, the method further comprising the step of:

routing IP addresses subsequently transferred from a device to the router device via the currently set up default conversion device until a new IP address specifically set up in the selection unit is transferred to the router device (col. 12, lines 7-16).

16. Regarding claim 12, Bhatia discloses a router device for setting up a communications connection via an IP-oriented network, originating from a device connected to a local computer network, the local computer network being connected via

Art Unit: 2142

the router device to a communications network which, in turn, is connected via a plurality of conversion devices to the IP-oriented network, the router device comprising:

a selection unit for selecting one of the conversion devices with reference to information transferred by any given device (col. 5, line 62 – col. 6, line 8), wherein the information may be transmitted to the router device by an arbitrary device connected to the local computer network, and wherein the information identifies the selected one of the conversion devices (col. 6, lines 9-18); and

a control unit for subsequent set-up of a communications connection via the communications network to the selected conversion device (col. 4, line 64 – col. 5, line 8).

17. Regarding claim 13, in accordance with claim 12, Bhatia discloses the router device wherein the selection unit is a server, a separate socket connection being provided between the device and the selection unit for transferring the information (col. 4, lines 64-66).

18. Regarding claim 14, in accordance with claim 12, Bhatia discloses the router device wherein the selection unit is designed according a Domain Name Service proxy (col. 5, line 66 – col. 6, line 8).

### ***Claim Rejections - 35 USC § 103***

19. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

20. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

21. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bhatia in view of Guerin et al. (U.S. 6,243,754), hereinafter referred to as Guerin.

22. Regarding claim 6, Bhatia discloses the use of a default conversion device as mentioned above, but is silent on the method of configuring the selection unit as a function of time of day. However, in related art, Guerin discloses the common use of a router that determines an appropriate conversion device based on a performance or a cost characteristic, one of the cost characteristics being a function of the time of day (see Guerin, col. 3, lines 9-20). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to utilize the time of day function cost characteristic as disclosed by Guerin in combination with the conversion device method as disclosed by Bhatia. One of ordinary skill in the art would have been motivated to make such a combination in order to ensure the proper conversion device is selected appropriately (see Guerin, col. 3, lines 7-30, specifically lines 11-14).

23. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bhatia.

Art Unit: 2142

24. Regarding claim 8, Bhatia is silent on the method to clear down a different device connected to the local computer network when a conversion device terminates another connection, however, it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to utilize this method because it is reasonable to not terminate an active connection based on a separate entity's inactivity (see Bhatia, col. 16, lines 44-54).

25. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bhatia in view of Duvall et al. (U.S. 5,884,033), hereinafter referred to as Duvall.

26. Regarding claim 15, Bhatia discloses the use of a router but is silent on the use of an IP address filter. However, Duvall discloses a filtering system used in order to ALLOW or BLOCK incoming or outgoing transmissions (col. 4, lines 22-36). It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to utilize the IP address filter as disclosed by Duvall in combination with the router device disclosed by Bhatia. One of ordinary skill in the art would have been motivated to make such a combination in order to control the flow of incoming and outgoing packets through the router and have the ability to block transmissions when it is deemed necessary to do so (see Duvall, col. 4, lines 22-36).

### ***Response to Arguments***

27. Applicant's arguments filed 28 February 2005 have been fully considered but they are not persuasive.

28. (A) Applicant argues that "Bhatia ... does not teach or suggest, nor even contemplate, the claimed invention wherein information may be transmitted to the router

Art Unit: 2142

device by an arbitrary device connected to the local computer network, with the information identifying the selected one of the conversion devices.”

29. As to point (A), the Examiner respectfully disagrees. Bhatia discloses in an exemplary embodiment (col. 5, line 61 – col. 6, line 48) the ability to set up a local computer network (LAN) wherein a plurality of arbitrary devices are connected to the LAN having the ability to provide information to a router pertaining to information which identifies certain conversion devices, which are also connected to the LAN as well (col. 6, lines 9-14). By definition, an “arbitrary device” is interpreted to be of any type of device available, in the preferred embodiment disclosed by Bhatia, the method utilizes DNS servers, which are utilized because of their user convenience and simplicity (col. 6, lines 15-18).

### ***Conclusion***

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
